

GULFSTREAM G650

HB-IVJ

The Gulfstream G650 ultra-high-speed, ultra-long-range business jet is, quite simply, the gold standard in business aviation. The flagship of the Gulfstream fleet flies faster, farther, and more comfortably than any other business aircraft in its class. No traditional business jet will take you closer to the speed of sound. Exceptional power and ultra-long legs aside, the G650 will be remarkably versatile. It will deliver excellent take-off and landing performance with a balanced field length of just 5,858 feet (1,786 m). This luxury aircraft is designed with three 26 inch monitors for viewing of Apple or satellite TV and each seat has a personal television screen. Cabin entertainment can be controlled by an Apple iPhone application. The aircraft is also fitted with high speed Internet available during the flight.
