

FALCON 900LX G-YCKF

Due to its classic trijet engine design and advanced aerodynamics, the Falcon 900LX reaches further destinations with increased fuel efficiency and safety. The Falcon 900LX flies the furthest in its class at 4750 nautical miles nonstop, yet keeps the exceptional takeoff field performance that is characteristic to the Falcon series. The innovative flight deck allows pilots to maintain close control of flight progression while the quiet, spacious, and custom-crafted cabin offers passengers the uncompromising capability to perform at peak levels.
